

Rebecca Allen, from Mount St. Joseph's School of Arts and Sciences, has informed us of a **free training opportunity** with an EU funded grant. Please see below for more information:

Unlock the Power of Generative AI

Free Customized Training for Local Businesses and Government

Mount St. Joseph University is partnering with Laurea University of Applied Sciences (Finland) to offer free, hands-on training in generative AI tools such as ChatGPT. This program is part of a European Union-funded international education initiative and is completely free.

Who Should Participate

Local small businesses and government organizations interested in:

- Enhancing productivity and efficiency through AI
- Receiving customized training tailored to organizational needs
- Building international professional and educational connections

Purpose of the Program

This initiative creates a bridge between international education and community impact. Finnish students seek to learn about U.S. culture, work, and innovation, while American students are eager to gain practical experience by working with local experts.

Your Commitment

1. Participate in a brief Zoom meeting with our team to complete a needs analysis.
2. Attend a free, customized workshop designed specifically for your organization.

Benefits

- Fully funded, with no cost to participants
- Practical training sessions that apply directly to workplace tasks
- Collaboration with U.S. and Finnish students and faculty

Next Step

To participate, please email Dr. Rebecca Allen, rebecca.allen@msj.edu, and we will set up a Zoom call.
