

Presents:

LTAP Snow and Ice Control Training

This 3-4 hour class provides employees and managers with an overview **of snow and ice removal responsibilities, preparation activities, winter maintenance operations, and weather basics**. The class will also cover choosing **deicing materials and material application rates, and the factors considered when making these decisions**. Different types of snow and ice removal equipment and how they are used will be covered. Safety considerations will be discussed throughout the class, from material handling to equipment operation.

- When:** Thursday December 11th at the Blue Ash
North Fire Station (10647 Kenwood Rd. Blue Ash, OH
45242)
- Time:** 12:00pm - 4:00pm (each session)
- Cost:** FREE
- Presenter:** Gary Browning, CPM, Training Manager and Safety Circuit
Rider for the Ohio LTAP Center. His background includes
over 30 years of experience in Public Works. Gary earned his
Road Master Certificate in 2012 and earned his (CPM)
Certified Public Manager from the John Glenn College of
Public Affairs, OSU in 2014.
